

Kloudspot QuickStart™

The fast path to creating intelligent spaces

Everything an organization needs to get started with the Kloudspot™ Situational Awareness and Intelligence Platform, all in one bundle.

The Kloudspot platform converts the physical movement and activity of people and devices into contextualized digital data streams and through analysis, obtains real-time situational awareness. Using data collected from Bluetooth, Wi-Fi, environmental sensors and connected cameras, married with artificial intelligence (AI), the physical actions and movements of people and devices are converted into digitally treatable data that provide meaningful insights. The platform continually learns and optimizes those engagements on its own through advanced AI.

The Kloudspot QuickStart bundle includes:

- Digital display monitors (floor standing)
- Kloudspot managed appliance
- Connected camera(s) for real-time facial recognition and PPE detection
- Connected thermal scanner for 'no-contact' temperature readings
- Wi-Fi and Bluetooth receivers to monitor the perimeter space
- Subscription license for the Kloudspot Platform

This bundle is available with configurations and capacity options for small, medium and enterprise organizations. Please contact Kloudspot or your sales partner for details.

About Kloudspot

Founded in 2016, the Kloudspot Situational Awareness and Intelligence Platform enables the creation of intelligent spaces and engagement systems using Wi-Fi and sensor networks. Organizations can leverage automated, AI-driven, actionable insights to deliver compelling digital engagements and ensure safety measures for constituents. Kloudspot partners develop solutions that enhance health and safety, lifestyle, and workspace/education experiences for their customers.
