Making Physical Spaces Intelligent and Interactive

Who we are

Kloudspot is a trailblazer in the realm of Intelligent Interactive Spaces. Our passion lies in harnessing the potential of advanced AI, Machine Learning, and IoT technologies to deliver digital business transformation.

Our team comprises of visionaries in networking, AI, and IoT, coming together to drive true digital transformation. Our commitment is to revolutionize the way enterprises maximize their investments in both assets and people, ultimately shaping smarter and more efficient environments for the future.

What we do

Kloudspot converts physical events and physical actions into digital data for intelligent analysis, by seamlessly integrating IoT sensors, bluetooth devices, WiFi access points, IP cameras, biometric sensors, environmental sensors and more. As a hardware agnostic software solution provider, with our flagship LISA (Location Intelligence and Situational Awareness) platform, we empower businesses to extract unparalleled insights from their physical spaces. LISA is an advanced AI & ML platform that enables real-time insights, predictive and prescriptive analytics for customer engagement, workforce enablement, operational efficiency and improved business modeling.

Global Presence

Headquartered in • USA Offices in • UAE • INDIA • JAPAN

● Marquee customers across the globe in five of seven continents

Global Partners

Awards

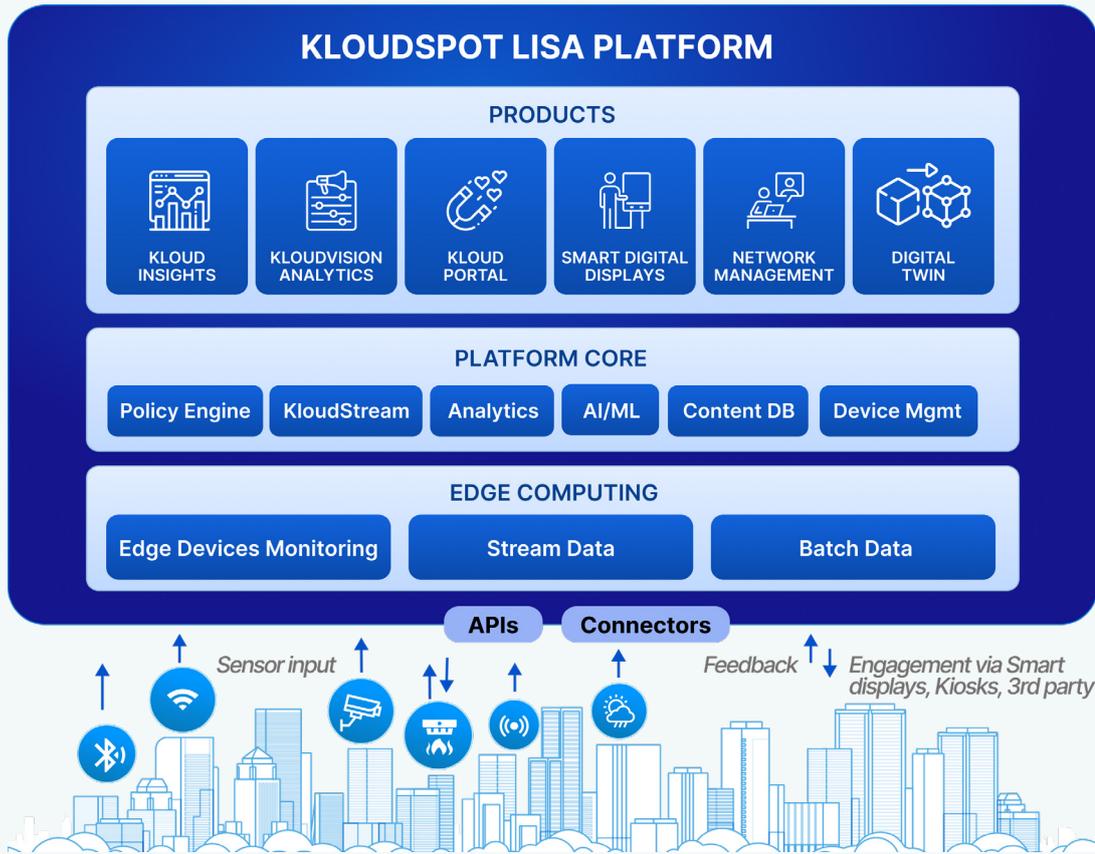

Breakthrough Innovation 2023

25 Hottest Edge Software Companies:2020

LISA Platform

Highlights

Enterprise Grade, Modular & Scalable

High availability, High scalability, Activate required modules

Hardware Agnostic

Integrate any IoT sensors and systems with seamless data communication

Deployment

Cloud Native, On-premise and Hybrid deployment with on-premise data

Security & Governance

Containerized environment with security embedded in DevOps process

Core Services

<p>KloudInsights</p> <p>Realtime insights with Descriptive Reports, Dashboards and Predictive & Prescriptive analytics.</p>	<p>KloudVision</p> <p>Harness advanced Computer Vision AI & ML to extract insights from video data in real-time.</p>	<p>KloudPortal</p> <p>Turn your Wi-Fi into a powerful data intelligence & marketing tool. Deployed on-cloud or on-premise.</p>	<p>KloudDisplay</p> <p>Cloud managed displays, interactive kiosks. Integrated with KloudVision for programmatic planning.</p>	<p>Digital Twin</p> <p>Create immersive digital twins for improved planning, ops, simulations and predictive supervision.</p>	<p>ICCC</p> <p>Enable a nerve center, seamlessly connecting data, communication, and decision-making processes.</p>
