

# LISA Platform

**Unlocks the potential of your physical space.**

Kloudspot LISA is an advanced AI & ML platform that enables situational awareness, real-time insights, predictive and prescriptive analytics for customer engagement, workforce enablement, operational efficiency and improved business modeling. LISA's Digital Twin offering propels you into a realm of deep intelligence, simulations and immersive interactions.

**KLOUDSPOT SOLUTIONS**

By seamlessly integrating IoT sensors, Bluetooth devices, WiFi Access Points, IP Cameras, Biometrics, Environmental Sensors and more Kloudspot converts physical events and physical actions into digital data for intelligent analysis. LISA Platform is hardware and network agnostic and its versatility extends to complex systems through seamless API integration, providing a holistic view of your environment.

# Highlights

## Enterprise Grade

High availability, operational consistency, reliability, visibility and control

## Scalable & Modular

- Scale to handle large data and multiple users without performance degradation
- Modular-activate required services and features

## Deployment Options

- Cloud Native
- On-premise and
- Hybrid deployment with on-premise data

## Interoperability

- Integrate with other systems, like ERP, CRM, etc.
- Support enterprise integration protocols and patterns.

## Customization and Extensibility

- APIs for custom integrations.
- SDKs or development tools to extend platform functionality.
- Support for plugins, modules.

## Content Management

- Digital asset management
- Tools to manage and distribute content

## Automation and Workflows

- Event driven triggers
- Robotic process automation capabilities (RPA)

## Security and Governance

- Role based access (RBAC)
- Data encryption in transit
- Compliance (GDPR/CCPA)
- SSO, Multifactor Authentication

# Core Services

## KloudInsights

Realtime insights with Descriptive Reports, Dashboards and Predictive & Prescriptive analytics.

## KloudVision

Harness advanced Computer Vision AI & ML to extract insights from video data in real-time.

## KloudPortal

Turn your Wi-Fi into a powerful data intelligence & marketing tool. Deployed on-cloud or on-premise.

## Digital Twin

Create immersive digital twins for improved planning, ops, simulations and predictive supervision.

## KloudDisplay

Cloud managed displays, interactive kiosks. Integrated with KloudVision for programmatic planning.

## ICCC

Enable a nerve center, seamlessly connecting data, communication, and decision-making processes.

# Use Cases

Intelligent Spaces

People Analytics

Retail Experiences

Smart Surveillance

Airport Operations

Hybrid Work

Smart Parking

Access Control

ICCC
